DESCRIPTION

Device Setting Apparatus, Device Setting System and

Recording Medium recording Device Setting Program

5 THIS APPLICATION IS A 371 OF PCT/JP00/09213 12/25/2000
Technical Field

10 The present invention relates to a device setting apparatus for setting a device to a prescribed state, a device setting system and a recording medium recording a device setting program.

Background Art

15 For example, Japanese Patent Laying-Open No. 6-233359 (1994) discloses a control unit as a conventional device setting apparatus. This control unit is applied to a remote control device for letting the operator input a voice identical to that having a pattern previously stored in an internal memory thereby outputting a control command with respect to the input voice to a controlled device without operating any key of the
20 remote control device and remote-controlling the controlled device with the voice.

25 However, the aforementioned control unit can execute only a single control command with respect to a single voice. In order to set the controlled device to a target device state, therefore, the operator must repeatedly raise his voice for
